

Remarks

Claims 1-10 are pending in this application. The examiner has allowed claims 1-4. The examiner has rejected each of claims 5-10 as being incomplete under 35 U.S.C. §112. The examiner has rejected each of claims 5-7 under 35 U.S.C. §101 as being directed to non-statutory subject matter. The examiner has rejected each of claims 5-10 under 35 U.S.C. § 103 as being obvious over U.S. Patent No. 6,0121,098 to Bayeh et al.

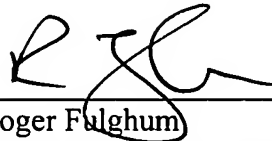

A. Independent Claims 5, and 8 and Amendments Thereto

The Examiner stated that claims 5-10 would be allowable over the §101 and §103 rejections if the changes drafted by the Examiner were made. (Office Action, p.4). Claims 5 and 8 have been amended herein to incorporate the changes drafted by the Examiner. The Examiner rejected claims 5-10 under §112 as omitting structural cooperative relationships, these relationships being the script causing the processor to operate. (Office Action, p.2). Applicants respectfully submit that the amendment made to claims 5 and 8 (drafted by the Examiner and incorporated herein) include the necessary structural cooperative relationships between the product, the script and the processor.

Conclusion

Applicants respectfully submit that the pending claims 1-10 of the present invention, as amended, are allowable. Applicants accept the allowance of claims 1-4. Applicants respectfully request that the rejection of claims 5-10 be withdrawn and that these claims be passed to issuance.

Respectfully submitted,
